

MODIFIED FRONT BRAKE FORKS

R-R Silver Dawn, Silver Wraith, Bentley MKVI, R type

N. W. Geeson

These forks were standardised on very late R types after chassis B 60 XF, and were intended to be retrofitted to Bentley MKVI after chassis B1 GT. Especially when more front end braking is demanded it is wise to fit them. Unfortunately it is not well known that these forks should be fitted, along with a different stop pin and clevis pins. One of these pins, the clevis I believe, is not available but can be obtained commercially.

- Modified fork part number RG 8490
- Modified Stop pin RG 8489
- Modified Clevis Pin K 4561/Z
